Norman Shorr, MD
Jonathan A. Hoenig, MD

AXELROD LECTURER
Angelo Tsirbas, MD
Sydney, Australia

LABORATORY DIRECTOR
Daniel Rootman, MD

VIDEO LAB DIRECTOR
Steven Leibowitz, MD
Course Description
This course is a tightly focused survey of surgical and non-surgical options for periorbital and facial rejuvenation. The multidisciplinary faculty, renown experts in their fields, focus on practical techniques and conceptual pearls designed to send participants home with tools that they can immediately apply to their own practice.

Objectives
At the conclusion of this program participants will be able to:

• Recognize and be familiar with the palate of options, evaluation, and decision making for non-surgical aesthetic facial rejuvenation.

• Practice safe techniques of aesthetic upper eyelid surgery, and aesthetic lower eyelid surgery.

• Identify the principles of midface rejuvenation with a review of the anatomy and physiology as it relates to safe procedures.

• Assess the relevant anatomy and potential anatomic danger areas related to surgical rejuvenation of the orbit, face and neck.

• Avoid surgical complications or provide appropriate management of complications.

• Refer to practical course material and feel comfortable incorporating new techniques safely and conservatively into their own practice.
Aesthetic Eyelid and Facial Rejuvenation Course

FRIDAY, July 21, 2017
Jules Stein Eye Institute, CHS 53-129, Dissection Laboratory – 7:30am-4:30pm
The dissection workshop focuses on anatomic and surgical pearls of core aesthetic surgical procedures such as upper and lower blepharoplasty, Asian blepharoplasty, forehead lift, mid face lift, and canthoplasty options. The various procedures will be reviewed in step-by-step fashion, utilizing a detailed dissection manual, bullet point surgical videos, and prosections by faculty experts. A limited enrollment will promote close interaction between participants and faculty so that each participant can perform the procedures on cadavers, with faculty guidance.

Due to popular demand, we have once again added a live audio visual feed of the aesthetics dissection course. We have tried this once before and received rave reviews. The course directors, faculty, and guest faculty are “miked up” and seen in high definition performing the dissections from our Friday dissection course in our audio visual suite. The live audio visual suite also receives all the live lectures given in the laboratory. A faculty monitor will be present at all times in the audio visual suite to relate your questions to the “miked up” faculty. Then the same faculty will also come to the audio visual suite to lead further discussion. Both the faculty and the attendees loved this new educational experience.

SATURDAY, July 22, 2017
Jules Stein Eye Institute, RPB Auditorium – 7:30am-5:00pm
The second day of the course will be didactic covering the nuances of technique that are critical for achieving the elegant results demanded by today’s sophisticated patients. This course brings together innovative experts in aesthetic oculoplastic surgery to share their experiences, techniques, and pearls.

A range of talks will be given covering aesthetic blepharoplasty, endoscopic forehead surgery, face lift surgery, and non-incisional techniques. Course participants unable to attend the first day of the course are welcome for the second day.

Online: Use your MasterCard, VISA, American Express or Discover Card. Go to www.cme.ucla.edu and click on “2017 Aesthetic Eyelid and Facial Rejuvenation”

ACCREDITATION
The Office of Continuing Medical Education, David Geffen School of Medicine at UCLA is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

The Office of Continuing Medical Education, David Geffen School of Medicine at UCLA designates this live activity for a maximum of 14.5 AMA PRA Category 1 Credits™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

DISCLOSURES
The FDA has issued a concept paper which classifies commercial support of scientific and educational programs as promotional unless it can be affirmed that the program is “truly independent” and free of commercial influence. In addition to independence, the FDA requires that non-promotional, commercially supported education be objective, balanced, and scientifically rigorous. The policy further states that all potential conflicts of interest of the CME staff and faculty be fully disclosed to the program’s participants. In addition, Accreditation Council for Continuing Medical Education policy now mandates that the provider adequately manage all identified potential conflicts of interest prior to the program. We at UCLA fully endorse the letter and spirit of this concept.
